

Hide The Hearts

- Gather 5 to 10 candy hearts --> Count the candy hearts with your child so they know how many there are
- Have your child close their eyes or look away and “hide” some of the hearts in a cup
- Have your child count the remaining hearts and try to figure out how many hearts are “hiding”

Example: If you start with 5 hearts and then hide 2 hearts, your child can see there are 3 still out. They should work to figure out that there are 2 hearts hiding.

This game is great with candy hearts, but you can use any item to play!
